

## **Secure & resilient architecture**

- Vulnerability detection in MBSA
- Autonomic computing
- Data-centric applications

## **Smart CI/CD**

- Supply chain analysis
- CI/CD Assistant
- Software debloating
- Scalable CI/CD

## **Secure Supply Chain**

- Secure-by-design
- Code/binary vulnerability analysis
- Dependencies and deployment descriptors security analysis

Application domains: Cloud and Distributed Computing, Smart Cyber-Physical Systems, IoT, Defense.
